

NOTES
 Link from J1-3 to J1-11 is cut in STK300 dongle.
 Original STK200/300 dongles only connected J1 pins 18 to 21 to GND.
 Original STK200/300 dongles did not include J3, J4, LED1 or R2.
 The ribbon cable must be assembled such that all conductors are "crossed over". This means 1-10, 2-9, ... 10-1.
